

Medicine Rock Reflections

The emergence and manifestation of consciousness. In the late 1960s my parents purchased land northwest of Ft. Collins, Colorado. We named it Medicine Rock. I was not born there, but Medicine Rock was a birthplace for me; it was the beginning of consciousness and a place that continues to be vital for my becoming. The reflections of Medicine Rock presented here are like spring waters finally percolating through layers of rock and earth to reach the surface. Medicine Rock was a place where exposure to the elements shaped my inner landscapes to be attuned to the vital spiritual energy inherent in the natural world and to feel a deep connection with it. The place didn't just grow on me; it grew in me. There was an unmistakable feeling of being a part of the greater whole that was instilled in me at a young age, the roots of which continue to grow deeper in my consciousness with each passing year. Will I ever get back to Medicine Rock? The manifestation of the life force I became aware of there is just as profound today, and I return to Medicine Rock each time I am out in the wilds. In the tradition of Thoreaus Walden, Gardner's Medicine Rock Reflections focuses on a treasured location, treating it lovingly while paying special attention to interactions between humans and the land.
