

I Cured My Chronic Fatigue - So Can You

Chronic Fatigue is NOT incurable. I can say this with all confidence as I cured my own Chronic Fatigue Syndrome (C.F.S.) but not after having spent 15 years going round in circles struggling using every conventional and complementary therapy available. The net result was that I wasted ?20,000 on therapies - all I had been doing was chasing symptoms and trying to relieve them when my focus should have been on tackling the root causes of my illness. This ebook has been written to stop people making the same mistakes I did and to increase awareness of environmental toxicity and provide information on the treatment of Chronic Fatigue Syndrome, (C.F.S.) and is also particularly relevant for sufferers of Post Viral Fatigue (P.V.F.) and Myalgic Encephalomyelitis, (M.E.). I was originally diagnosed as having Post-Viral Fatigue and bed-ridden for the first 6-12 months. My limbs felt like lead yet test results proved so inconclusive that doctors eventually labelled me as psychosomatic after their medical test proved so inconclusive. I have seen a lot of nonsense written about this illness, my favourite being that it's all in the mind! I have seen theories that CFS is created because of some bad bacteria or other pathogen (yeast/bad bacteria/viruses/parasites). I have seen authors recommending exercise! I have also experienced and seen a lot of information and recommendations about learning to live with the condition which I decided against. The KEY to returning to good health is to identify the root causes that are overloading Your Immune System and Creating Chronic Fatigue, this eBook shows you how and what I did to beat my Fatigue naturally without the use of drugs! Good Luck Regards Ian Solley
